## Boxmaker News

### NEW FACTORY & OFFICES

In April 2009, Autobox Machinery Ltd completed a move to a brand new purpose built factory and office building in Leighton Buzzard, UK.

Situated on the prestigious Youngs Industrial Estate, the new building provides a modern, efficient working environment for our staff and comfortable facilities for all our visitors.

Comments Barry Tabor, Managing Director:

“Although we are in difficult economic times, demand for Autobox machines and our after sales service remains strong. The investment in a new factory confirms our belief in the future and provides us with the facilities to continue with the development and expansion of our range of Box Making machinery.
